Test d

Overview

The test for d is to establish a shape that will later appear in several other letters and will because of the high frequency of its use end up having a great deal of impact on the character and the utility of the font. The shape of the d may echo the o significantly but often takes a different direction. The d is also the first chacter with a long stem that will be added. The height of the asending stem also has a large impact on the proportional relationships of letters withink the design.

Design Hints

- *How much less heavy does the stem of the d need to be vs the n?*
- *How well is compensation of the joins in n a and d working together?*
- *What feeling does the bowl of the d set up?*
- *How much does the angle of contrast differ (if any) from the o?*
- *Remember to interpolation to compare solutions to each question.*
